## ABSTRACT

1. This is a preliminary basic report describing CSS-1 missile equipment at Teng-sha-ho Military Installation. This equipment was present as early as [redacted] and may have been there as early as [redacted]

25X1

25X1

2. This report consists of a location map, text, four photographs, and chronological, mensural, and reference data.

## INTRODUCTION

3. Teng-sha-ho Military Installation is approximately one-half kilometer north of Teng-sha-ho and 30 nautical miles north-east of Lu-ta (Figure 1). Except for eight buildings constructed between [redacted] the installation was complete

25X1

## BASIC DESCRIPTION

4. Teng-sha-ho Military Installation (Figure 2) is a wall-secured, road-served compound consisting of three barracks, two barracks/administration buildings, two barracks/support buildings, two storage/support buildings, three vehicle storage buildings, 11 support buildings, one vehicle storage and support building, one guardhouse, and numerous animal pens.

25X1

6. In addition to the permanent facilities, two different tents have been identified within the installation. On [REDACTED] tent was set up in the middle of the motor pool. A missile checkout tent measuring [REDACTED] was observed attached to one of the vehicle storage buildings in the motor pool on seven separate occasions between [REDACTED] (Figure 3). It was also possibly present on [REDACTED]

7. Objects which could not be positively identified but which may have been missile related were seen at the Teng-sha-ho facility as early as [REDACTED]. CSS-1 missile equipment was identified here for the first time on [REDACTED] photography, when one CSS-1 transporter-erector, one probable A-frame crane, two mobile gantry cranes, five possible CSS-1 cryogen trailers, ten cargo trucks, and 13 unidentified pieces of equipment were observed (Figure 4). On [REDACTED] two CSS-1 transporter-erectors, one A-frame crane with prime mover, and three other vehicles were observed (Figure 5). One transporter-erector was at the facility on [REDACTED] and one possible transporter-erector was there on [REDACTED]. On [REDACTED] one CSS-1 transporter-erector, one probable A-frame crane, one cargo truck, and five other trucks were at the facility.
